

As your child(ren)'s school nurse, I want to ask that you please try to make sure that breakfast is a priority in your household. In addition to the traditional breakfast foods such as cereal, toast, and muffins, some children might enjoy leftovers from dinner or a PB&J. We also offer a FREE healthy and filling breakfast here at school each morning from 7:30 – 7:50. Please let us know if you need more information.

## Benefits of Breakfast

- Eating breakfast can help improve math, reading, and standardized test scores.
- Children who eat breakfast are more likely to behave better in school and get along with their peers than those who do not.
- Breakfast helps children pay attention, perform problem-solving tasks, and improves memory.
- Children who eat school breakfast are likely to have fewer absences and incidents of tardiness than those who do not.
- By eating breakfast, students get more of important nutrients, vitamins and minerals such as calcium, dietary fiber, folate and protein.
- Studies have shown that children who eat breakfast on a regular basis are less likely to be overweight.
- Eating breakfast as a child is important for establishing healthy habits for later in life.
- What you eat for breakfast can have an impact on learning. One study showed that eating breakfast food high in fiber and low in sugar for breakfast helped students sustain the cognitive effects of breakfast.
